EXPERIENCE

Full-Stack developer

AlmaConnect

📅 August 2020 – present 📍 Gurgaon, India

- The responsibilities assigned are development of almaconnect.com platform based on Ruby on rails and AngularJS. Also responsible for directly handling client requests, fixing of bugs and making decisions on feature development from the product pov.
- Solely responsible for creating and maintaining of static websites for client institutes in ReactJS.

Tech Intern

AlmaConnect

📅 January-July 2020 📍 Gurgaon, India

- Worked in Software Development team at AlmaConnect and was assigned responsibilities to develop features for super admins for better product analysis and management.
- Responsibilities also included creation of static websites for client institutes

Research Internship

Plant disease detection - DAIICT

📅 May-July 2019 📍 Gujarat, India

- Trained a Convolutional Neural Network that would not be affected by the rotation of input images making it a Rotationally Equivariant Neural Network for Detecting Diseases in plants by taking the images of their leaves. Built an end to end system which would detect the disease of plant from the image clicked and also recommend pesticides that are least harmful to the environment.

AWARDS AND ACHIEVEMENTS

- IEEE-WIE Mobile App Development Hackathon: 1st place
- Made it to the Elimination round of CodeChef's Snackdown-2017 with over 21000 teams registered during my freshman year.

PROJECTS

Lead Developer - AlmaNews

- Leading the front end development of [AlmaNews\(Beta version\)](#)
- A robust, ReactJS and Ruby on Rails application that serves newsfeeds to the business clients as per their requirements wherein they can specify what all prospect related data they want to track across 1000s of news sources across the globe.
- Also responsible for developing back-end API's
- For detailed description about the project, visit - [AlmaNews info](#)

Automated Static website creation - AlmaConnect

- Static websites can now be created/edited using a single form. The access to the form would be given to the client by which they could modify their websites.(Here's one of many live running static websites created by it [Indian Institute of Technology, Kharagpur](#)).
- Created various reusable components for static websites that would fetch relevant data from an API from [AlmaConnect](#) platform to be displayed on the website

E-Commerce website ([Click here](#))

- A demo E-Commerce website with both Admin and client roles with ReactJS, NodeJS and Express.
- It has working filters, lazy loading on the page and sandbox paypal payment integrated.

Free Mentorship portal AlmaConnect

- A portal aimed at connecting students to their alumni for guidance/mentorship.
- Students who are looking for mentorship fills up an application, gets verified and then published.
- Similarly, verified mentors check these published applications and contacts students that they find eligible.

Twilio WhatsApp integration

- Integrated twilio's WhatsApp api with the Jobs portal on AlmaConnect.
- It allows for the company to send regular updates to users regarding jobs applications.

Admin Panel - AlmaConnect

- Created Admin panel for feature specific access, statistical analysis and maintaining of the entire website data and expressing it in graphical form to clients.

HOBBIES

- Playing Guitar.
- Football.
